JBS DEV
We make complex, simple.

Making GenAI Technology Accessible and Affordable

Our approach to generative AI and machine learning is tailored and thoughtful. We specialize in utilizing this technology to revolutionize various aspects of your business – from marketing and customer engagement to operational efficiency and beyond.

JBS Dev's extensive experience in generative AI and ML is making an impact:

Revolutionizing Marketing
Our GenAI solution significantly streamlined the creation of personalized marketing campaigns for our customers, reducing time and expenses.

Providing Cost Efficiency
Our GenAI summarization tool dramatically cut down the manual labor hours our clients spent on document reviews, enhancing efficiency and providing cost savings.

Boosting Productivity
Our own GenAI-powered chatbot allowed our sales team to quickly access relevant project information, speeding up response times and decision-making process.

All attendees at MES are eligible for a FREE GENAI QUICK START! Scan the QR code to sign up.

Contact JBS Dev today to schedule a consultation. Whether you're looking to enhance customer experiences, optimize operations, or innovate your products and services, JBS Dev is your trusted partner for harnessing the power of artificial intelligence.

Try our easily deployable **GENAI QUICK START PROOF-OF-CONCEPT** that offers intelligent question and answer functionality, summarization, content and image generation, or powerful search capabilities:

- Quick setup and launch with a foundational code
- Fast ingestion & application of custom data to models

Exclusively Senior–Level Talent

Our rigorous hiring process allows us to attract the best senior level architects, engineers, developers and project leaders that have critical thinking, strong leadership skills and a ton of experience. Expect responsiveness, transparency, and the highest level of quality possible on each and every project.

Seamless Integration With Your Team

Our engineers can be your team if you do not have one or can integrate with your existing team if you do. With existing teams we use a structure we call "high velocity software development team", maximizing productivity for your existing team while integrating closely to increase effectiveness and return on investment.

U.S.–Based Development Team

You can't afford delays or sub-par systems created by junior or offshore teams. That's why we employ diverse, experienced, on-shore, industry-leading technology experts across all disciplines and platforms. For two decades, we have been working remotely across the U.S. with proven processes in place to maximize partnerships.

We pride ourselves on being problem solvers who seek to understand the root of your challenges and work as an extension of your team to ensure success. Drawing on our extensive experience across a spectrum of industries – retail, education, healthcare, finance, and non-profit, we provide an informed perspective, ensuring a tailored solution that aligns with your company needs and your motivation to achieve positive business outcomes.

JBS Dev expertise is trusted by companies just like yours.

From high-growth startups to Fortune 500 enterprises, we deliver results that matter to your business.
